I emailed Tala about this... she was not aware of any FDA contact on the OPPT side.

I think there has been some mention of establishing a more formal contact with FDA but nothing too extensive so far that I am aware of. Will check through my notes, etc. to see if I can find more details (if any).

Sorry am not more helpful.

Jeff, can you answer this? From the lab perspective, we aren't expanding beyond pesticide containers. We did notify FDA of the situation months ago, but the lab hasn't been in regular contact with FDA.

Subject: OCSPP/OECA/Regions Monthly Call - Request for PFAS Update

Hi Kimberly, Jeff, and Thuy,

I'm pulling together the agenda for this month's OCSPP/OECA/Regions monthly call and I received a request for a PFAS update. Specifically, Region 1 LCRD asked if the concern around fluorinated containers has expanded to include food containers, and if so, has there been any interagency coordination with FDA. I apologize for the short notice but if you're able to join us we're meeting this Thursday the 22nd from 12:00-1:30 pm. Please let me know if you're able to accommodate this request and I'll go ahead and add you to the agenda and put a hold on your calendars.

Thank you!
